

RUBBER GEL COLOURS

STEP-BY-STEP APPLICATION

01 - PREP

- Sanitize hands and nails.
- Push back cuticles and gently buff the nail surface.
- Cleanse with IBD Nail Prep or 99% Isopropyl Alcohol.
- Apply IBD Dehydrate (optional).
- Apply IBD PowerBond (optional for more adhesion).

02 - BASE COAT

(Natural Nails Only)

- Apply a thin layer of IBD Rubber Base Coat.
- Avoid contact with the skin.
- Cure for 30 seconds (LED) or 1 minute (UV).

03 - COLOUR APPLICATION

- Apply a thin coat of IBD Rubber Gel Colour.
- Cure for 60 seconds (LED) or 2 minutes (UV).
- Apply a second thin coat of the same color.
- Cure again for 60 seconds (LED) or 2 minutes (UV).

04 - TOP COAT

- Apply IBD No Cleanse Top Coat.
- Seal the free edge.
- Cure for 60 seconds (LED) or 2 minutes (UV).
- No need to cleanse after curing.

PRO TIPS:

- Always cap the free edge to prevent chipping.
- Apply thin, even coats to ensure proper curing.
- Work one nail at a time to prevent flooding.
- Avoid getting any product on the skin or cuticle area.
- Store gel away from sunlight and curing lamps to maintain product integrity.

REMOVAL INSTRUCTIONS:

- File the surface of the topcoat to break the seal.
- Soak a lint-free pad in acetone and apply to the nail with foil wraps or soak-off clips.
- Leave for 10-15 minutes.
- Gently push off softened product with an orangewood stick or pusher.
- Lightly buff and rehydrate the nail.
